May 27,

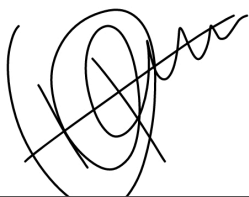

Dear sir/madam

I'm excited to be applying for a frontend web developer position at your company. As a qualified developer with two years of technical, technological, and problem solving experience, I enjoy working on a variety of projects. Pushing myself as a developer has always been important to me, I'll have the opportunity to grow and expand my skills while creating quality content for your team.

I have majored in html css & JavaScript
thorough understanding of react.js and it's principles
expertise in using hooks, redux redux saga
knowledge of modern authorization mechanisms such as JSON Web Token
code collaboration through git
proficiency in adobe photoshop as well as other nifty technologies that provide faster and easier
manipulation of information.
ability to understand business needs and translate them into technical requirements.
familiarity with modern FrontEnd build pipelines and tools.

Thank you for your time and consideration. As someone who is detail-oriented, driven, and dedicated to creating fantastic work, I'm looking forward to learning more about this position. Creation is one of the most important things to me, and I know that as a developer on your team, I will have the opportunity to create interesting and memorable projects our clients will love.

Sincerely,

A handwritten signature in black ink, consisting of a large, stylized 'E' followed by a series of loops and a final flourish.

Summary

This resume shares a map of some of my most remarkable merits in my career journey as well as some of the major skills I have earned in the process.

Education

Kenyatta University

2018 - 2022

BSc. Mathematics And Programming

At Kenyatta University I have developed important set of skills and experience over the years that are necessary in the field of web development. Through the numerous projects that I have work on, I have also managed to identify the best tools to optimize productivity.

Experience

Jigsaw Connect Inc.

2019 - 2020

Front End Developer

At jigsaw connect, tackling numerous project challenges from scratch as well as team working has been a wonderful opportunity for me to assess the ever-growing technologies. This has significantly enabled me to approach different challenges with more precision, relevance, timelines, and completeness.

Projects

Zitech Collage

2019 - 2021

Zitechnology

Software engineering is not only my career but my way of life. Building beautiful, responsive and interactive designs based on emerging technologies is something I cherish. Zitechnology is one of the numerous projects that have not only met many institutional needs but also inspired me the power of team working in this field.

Skills

html css & JavaScript
thorough understanding of react.js
and it's principles
expertise in using hooks, redux
redux saga
knowledge of modern authorization
mechanisms such as JSON Web
Token
code collaboration through git
proficiency in adobe photoshop
ability to manipulate the various
APIs and build web applications
relatively faster
ability to understand business needs
and translate them into technical
requirements.
familiarity with modern FrontEnd
build pipelines and tools.
UX/UI.
